ARCHITECTURAL TUBULAR LUMINAIRES

LIGHT IN ALIGNMENT WITH ARCHITECTURE

Light has an integral importance in architecture. It supports the overall impression of rooms and materials, of proportions, width, height and depth. Room atmospheres are in direct conjunction with the respective lighting situation. Light that is proportionate and individually customized to its function is therefore essential. Proper lighting plays an important factor for any architect, because not only does it brighten the rooms, buildings and paths, but also heightens people's awareness.

tubular luminaires are also the result of a holistic approach. They are the results of the interaction of profound technical know-how, ingenuity and perfected technologies. Waldmann has a unique wealth of experience in reference to light and its effects on architecture and on people.

Just as any good architecture, Waldmann's

THE HISTORIAL DE LA VENDÉE. TIMELESSLY STAGED WITH WALDMANN RL 70.

The Vendée expands along the Atlantic coast and is known for its architectural treasures. One of these is the Historial in Lucs-sur-Boulogne. The museum invites its visitors with the aid of innovative and interactive technology to experience the history of the Vendée. The Waldmann series RL 70 accompanies the "time travelers" with lighting in its most timeless form. The vertically suspended tubular luminaires, with a diameter of 70 mm, act like guideposts on the path from the Stone Age to the present.

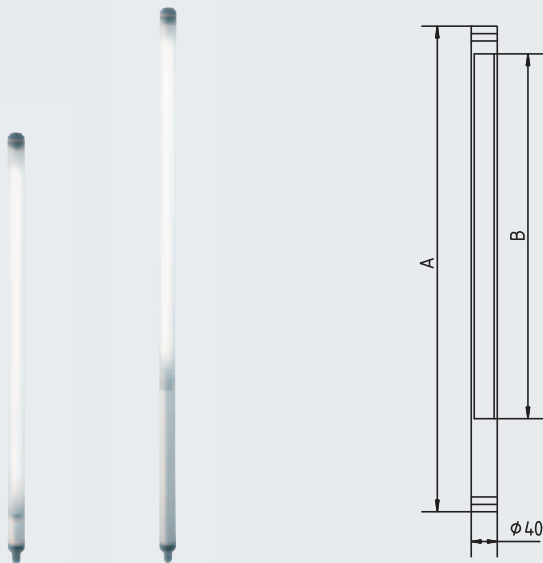

THE PISCINE JOSÉPHINE BAKER. ILLUMINATED BY WALDMANN RL 40.

The «Josephine Baker» swimming pool in Paris, with its unique design that of a ship and walls and roof consisting of glass, is anchored in the Seine river. Weather permitting, the roof can be opened within 5 minutes to get a view of the sun, moon and the stars.

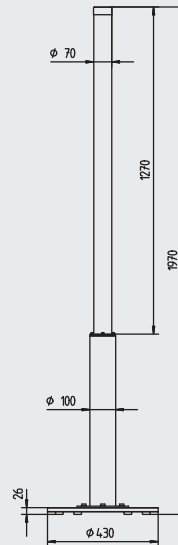

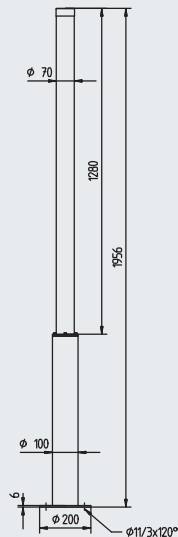

The Waldmann Series "RL 40" is used for the illumination. The luminaires are as thin as the struts on the glass roof at a diameter of only 40 mm; allowing the lighting solution and the structure to merge together.

LIEBHERR IN COLMAR. PIONEERING ILLUMINATION WITH WALDMANN RL 70 EP.

Liebherr's excavators are among the best worldwide. Due to the high demand, capacities at the Colmar plant are constantly expanding. Anyone that stands for dependable, sturdy and long-term technology, such as Liebherr, expects nothing but the highest quality from its suppliers. The selection of interior lighting therefore fell on the luminaires of the Waldmann Series RL 70 EP – indestructible technology behind everlasting design.

DESIGN DETAILS. UNLIMITED POSSIBILITIES.

Luminaire bracket:

- 1 Spherical retaining ring (aluminum, horizontal)
- 2 Spherical retaining ring (aluminum, vertical)
- 3 Spherical retaining ring (stainless steel)
- 4 Screw-in retaining ring (aluminum)
- 5 Wall retaining clip (stainless steel)
- 6 Folding bracket (stainless steel) only for RL 70
- 7 Wall bracket (spring steel strip, galvanized) only for RL 40
- 8 End cap (aluminum)
